Icon	Explanation
▌▌	(When selected during playback) Pauses the track.

Album art displayed during USB audio playback

When connecting a USB audio device to this unit and playing audio, the unit searches the database stored in the vehicle for the album art. If there is a match in the vehicle's database compilation to the music being played, the album art is displayed. The database information stored in this device uses database information in the Gracenote® music recognitions service.

NOTE

· *Automatically added information may differ from the actual information.*
· *Album art may not be displayed depending on how the music data is read.*

Album art display priority

You can change the album art display priority to either the album art saved in the USB audio device or the Gracenote® database.
Refer to System Settings on page 7-27.

Updating the database

The Gracenote® database can be updated using a USB Audio device.
Select "Gracenote Database Update" from the System Settings screen.
Refer to System Settings on page 7-27.
