MAZDA MX-5 ROADSTER / RF

Every Mazda we create is designed around one thing: you. Each car isn't just engineered to move you literally, but to do so emotionally. We call this Jinba Ittai, meaning a sense of oneness between car and driver. The Pure essences of this can be found in our two-seat sports car, the Mazda MX-5.

Featuring a front-engine, rear-wheel drive layout, signature 50:50 weight distribution, famed 6-speed gearbox, and free-revving choice of engines, it's guaranteed to put a smile on your face every time you press the ignition switch.

Mazda MX-5 key features

High levels of specification as standard including LED headlights and daytime running lights, heated seats, and rear parking sensors

Mazda Connect infotainment, Wireless Apple Carplay® & Android Auto™ connectivity

Choice of two bodystyles; the manual soft-top roadster or the electric hard-top Retractable Fastback (RF)

Superb safety and convenience equipment such as Driver Attention Alert, Hill Launch Assist, Traffic Sign Recognition, and Front Smart Brake Support (with autonomous emergency braking)

¹⁾ Figures shown are for comparability purposes; only compare fuel consumption and CO₂ figures with other cars tested to the same technical procedures.

These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load. There is a new test used for fuel consumption and CO₂ figures. The CO₂ figures shown however, are based on the outgoing test cycle and will be used to calculate vehicle tax on first registration.

MAZDA MX-5 ROADSTER / RF

Roadster

RF

PRIME-LINE

Civilian Advance Payment –

MAZDA MX-5 ROADSTER / RF KEY INFORMATION

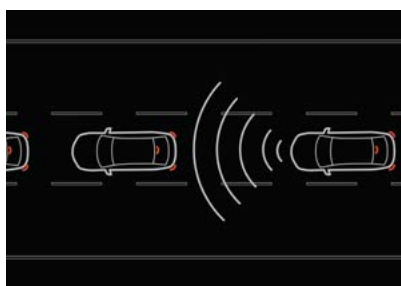

Engaging Transmission

Feel at one with the Mazda MX-5's 6-speed automatic transmission. SKYACTIV-MT is a light and compact manual transmission system that combines superior fuel economy with the crisp shifting feel that is expected of a sports car, ensuring perfect control and driver engagement.

Kinematic Posture Control

Turn every corner with a smile. KPC applies a very small amount of brake force to the inner wheel during cornering, the resulting brake force pulls the body down, suppressing body roll to improve cornering.

Advanced Safety Technology

Designed to keep you and your passenger safe on every journey, drive with confidence in the Mazda MX-5. Equipped as standard with cutting-edge safety features like front Smart Brake Support, Lane-Keep Assist, and Lane Departure Warning, it actively helps prevent accidents and keeps you in control. Experience peace of mind with every drive, knowing your Mazda is looking out for you.
