THE MAZDA FLEET RANGE GUIDE

WHY MAZDA

I am a company car driver

With award-winning technology, high specifications and advanced safety features, Mazda offers unrivalled company car driving pleasure. With a combination of competitive P11D values, CO_2 and low BIK, Mazda is the perfect choice for your new company car.

I am a Fleet Decision Maker

Choosing the right cars for your fleet can be taxing - our team of Regional Corporate Sales Managers are on hand to assist with all your Mazda Fleet queries. You'll be delighted you got in touch.

I am a Business Owner / Business Decision Maker

The benefits of choosing Mazda are numerous - our value proposition extends to class leading whole life costs, strong residual values and excellent reliability. Whether you decide to buy outright or lease your next car, we make the process simple and cost effective - leaving you to focus on your business.

SKYACTIV ENGINES AND HYBRID TECHNOLOGY

SKYACTIV VEHICLE ARCHITECTURE

ADVANCED TECHNOLOGY

MAZDA2 HYBRID

OUR FIRST SELF-CHARGING HYBRID

MAZDA2 HYBRID

Mazda2 Hybrid brings self-charging full hybrid technology to the Mazda range. Advanced hybrid technology provides great fuel economy and low emissions, along with the ability to drive in EV (Electric Vehicle mode) at low speeds, which means that no fuel is used, there are no CO_2 emissions and it has near silent operation.

Responsive and fun to drive, all Mazda2 Hybrid models are powered by a 1.5i petrol engine mated to an automatic transmission. Combined CO_2 emissions are as low as 87g/km and combined MPG of up to 74.3mpg, making Mazda2 Hybrid the ideal choice for fleet operators looking to control costs and reduce emissions.

MAZDA2 HYBRID GRADE HIGHLIGHTS*

	CENTRE-LINE	EXCLUSIVE-LINE in addition to Centre-Line, Exclusive-Line adds:	HOMURA in addition to Exclusive-Line, Homura adds:	HOMURA PLUS in addition to Homura, Homura Plus adds:

MAZDA3 HATCHBACK

AWARD WINNING DESIGN, EXHILARATING DRIVE

MAZDA3 HATCHBACK MHEV

The Mazda3 is centred around you, the driver. Ground-breaking Mazda e-Skyactiv X petrol engine technology delivers CO_2 emissions as low as 126g/km and combined fuel consumption up to 50.4mpg for a refined, efficient drive and exceptional environmental performance, making the Mazda3 an ideal choice.

Mazda3 also benefits from Mazda M Hybrid, an intelligent Mild Hybrid system which enables the Mazda3 to use less fuel without loss of driving pleasure.

With its powerful and sleek presence, the Mazda3 hatchback embraces the latest Kodo design language with a strong sporty appeal that stirs your senses even before you drive. The human centric cockpit and finest quality materials deliver the purest form of Jinba Ittai – a true connection between car and driver.

And thanks to Mazda's suite of i-Activsense safety technologies, you can enjoy the Mazda3 knowing that you and your passengers are safe and comfortable.

ALL-NEW MAZDA6e

CRAFTED WITH JAPANESE SOUL

ALL-NEW MAZDA6e

Introducing the all-new Mazda6e, a bold new chapter in the evolution of the globally acclaimed Mazda6. Fully electric and meticulously crafted with Japanese soul, the Mazda6e embodies Mazda's commitment to design excellence, innovative technology, and an unmistakable driving experience.

Showcasing Mazda's award-winning Kodo: Soul of Motion design philosophy, the Mazda6e delivers a dynamic, elegant presence that commands attention on every journey. Step inside to discover a beautifully crafted, driver-centric cabin where 'Ma', the Japanese 'beauty of empty space', harmonises with premium materials to create an environment designed for comfort, control, and pure driving enjoyment.

With a simplified range of just two specification levels, the Mazda6e arrives comprehensively equipped as standard, offering a rich suite of advanced safety, convenience, and connectivity features, ensuring fleet decision making remains effortless and transparent.

While it may not be Mazda's first electric vehicle, it is undoubtedly the one that sets a new benchmark, with confident on-road presence, striking design, and the refined yet engaging performance for which Mazda is renowned. The Mazda6e isn't just another EV; it's the one that defines the future of Mazda electric mobility.

MAZDA CX-30

FLOWING BEAUTY OF A COUPE, BOLD TOUGHNESS OF AN SUV

MAZDA CX-30 MHEV

The Mazda CX-30 is a compact crossover combining the bold proportions of an SUV with elegant styling that embodies Mazda's Kodo design language.

The CX-30 features Mazda's ground-breaking e-Skyactiv X petrol engine technology, which burns less fuel than a conventional petrol engine, but makes more power. It produces fewer emissions, but provides better performance than a regular petrol engine, with CO_2 emissions as low as 129g/km and combined fuel consumption of up to 49.6mpg.

Mazda's Skyactiv-Vehicle Architecture underscores the CX-30's sleek shape, hinting at the streamlined silhouette of a coupé, while its dimensions deliver the sense of rugged stability you'd expect of an SUV.

As standard, the advanced 24V Mazda M Hybrid mild-hybrid system, uses kinetic energy from regenerative braking to power the electronics and assist acceleration, helping you enjoy outstanding performance with low running costs and a truly involving drive.

Mazda CX-30 is available with i-ACTIV All-Wheel Drive technology for increased traction and a reassuring sense of control every time. The system helps to maintain grip and steering accuracy by shifting vehicle weight upon turn entry and exit to achieve a smoother drive.

MAZDA CX-30 GRADE HIGHLIGHTS

BATTERY ELECTRIC VEHICLE

ALL-NEW MAZDA6E

In pursuit of a more sustainable future, without compromising the engaging and intuitive driving experience you expect from Mazda, we created the all-new Mazda6e. A fully electric evolution of an icon, the Mazda6e represents the next step in Mazda's journey towards zero-emission mobility.

Designed for drivers ready to embrace the electric lifestyle, the Mazda6e combines refined performance with intelligent efficiency. Powered by a 78 kWh lithium-ion phosphate battery and advanced electric drivetrain, it delivers smooth, responsive acceleration and the quiet confidence that defines modern electric driving.

With fast-charging capability, the Mazda6e can recover 30 to 80% range in just 15 minutes[1], while offering up to 348 miles[2] of all-electric driving on a full charge. This ensures both everyday usability and the freedom for longer journeys, without compromise.

The Mazda6e also demonstrates outstanding environmental credentials, producing zero tailpipe emissions and enabling a more responsible way to drive, without sacrificing comfort, performance or driving enjoyment. It is the Mazda you know and trust, reimagined for a new electric era.

KEY INFORMATION

The all-new Mazda6e is compatible with the most widely used charging standards, featuring a Type 2 connector for AC charging at home and public locations, as well as CCS for DC rapid charging on the go.

The Mazda6e is supplied with a Type 2 Mode 3 cable for use with home wallboxes or public AC charge points. Using a dedicated home wallbox, the Mazda6e can charge at up to 7.2 kW, providing a convenient and efficient solution for everyday charging, while DC rapid charging is possible up to 195 kW for short efficient stops when needed adding 30 to 80% in just 15 minutes[1]

Both the charging port and cables are fully weather resistant, allowing safe and reliable charging in all conditions.

When connected, the charging cable securely locks into the vehicle, so it can be left unattended with complete peace of mind.

[1] Charging times are based on an ambient temperature of 25°C and will vary depending on a variety of factors including the output of the charger being used, ambient temperature and battery state.

[2]WLTP range of 348 miles is based on standardised laboratory testing and may not reflect real-world driving conditions. Actual range will vary depending on driving style, speed, weather, use of heating or air conditioning, vehicle load, terrain, and battery condition.

MAZDA CX-60 & MAZDA CX-80 - PHEV

e-SKYACTIV PHEV – PLUG-IN HYBRID ELECTRIC VEHICLE

In order to achieve better environmental performance without compromising on the intuitive driving you come to expect from a Mazda, we developed our Plug-in Hybrid vehicles, the Mazda CX-60 and the all-new Mazda CX-80.

Ideal for those drivers who want to transition into the EV lifestyle, this e-Skyactiv Plug-in Hybrid SUV is the most powerful car Mazda has produced. It is equipped with a naturally-aspirated four-cylinder 2.5-litre engine, coupled with a 129KW electric motor and a 355V, 17.8kWh high-capacity lithium-ion battery. This combination of engine and motor delivers a total system output of 327ps and 500Nm of torque.

Mazda's first PHEV also displays outstanding environmental credentials with the ability to drive utilising just the electric motor, meaning that the vehicle will use no petrol and produce 0g/km of CO_2. And using a combination of both petrol and electric driving, the Mazda CX-60 and Mazda CX-80 exceptional fuel consumption and low emissions.

CHARGING OVERVIEW

What you need to know...

- The Mazda CX-60 & CX-80 are compatible with the most common charging connectors (Type2) for both at home and out-of-home charging, via AC.
- Charging cables and power sockets are completely waterproof so can be used at any time to charge your vehicle.
- The sockets lock into the car, meaning it is secure and safe to leave unattended.
- A Type 2 Mode 2 cable for AC charging via a UK 3-pin plug and a Type 2 Mode 3 cable for AC charging via home or public charge points are both included with the car.
- Maximum charge of 7.2kW taking approximately 2 hours 20 minutes to charge from 0-100%.^

^Charging times are based on an ambient temperature of 20°C and will vary depending on a variety of factors including the output of the charger being used, ambient temperature and battery state. Figures shown are for Mazda CX-60 PHEV.

MAZDA CX-60 & MAZDA CX-80 - DIESEL

e-SKYACTIV D MHEV – MILD HYBRID ELECTRIC VEHICLE

For those who frequently drive long distances or need to regularly tow heavy loads, we have developed the latest in Diesel engine technology.

Our 3.3-litre in-line six-cylinder e-Skyactiv D diesel engine features Distribution-Controlled partially Premixed Compression Ignition (DCPCI) Technology. This highly innovative advanced combustion technology makes the new e-Skyactiv D one of the cleanest diesel engines in the world.

Developed using our 'right sizing' concept which optimises displacement to improve both fuel and power efficiency, the all-new direct injection inline six-cylinder e-Skyactiv D is available with a choice of two power outputs: 200ps with rear-wheel drive which provides 450Nm of torque (Mazda CX-60), and 254ps with Mazda i-Activ AWD (all-wheel drive) which provides 550Nm of torque (Mazda CX-60 and Mazda CX-80).

Both Diesel powertrains feature a new 48v Mazda M Hybrid Boost system. Our innovative evolution of mild hybrid vehicle technology uses three main components to capture energy that is normally wasted during braking. It stores that energy within the 48v Lithium-ion Battery and uses it to assist the engine and power the car's electrical systems, meaning you can drive further on a tank of fuel whilst also contributing to lower CO_2 emissions and other particulates.

SKYACTIV-VEHICLE DYNAMICS - ENGINES AND MAZDA M HYBRID MHEV

SKYACTIV-G / e-SKYACTIV G

Both our Skyactiv-G and e-Skyactiv G engines are highly-efficient direct-injection petrol engines, achieving impressive engine efficiency thanks to the high compression combustion, resulting in excellent fuel economy and low CO_2 emissions.

Our 140ps e-Skyactiv G*, 165ps e-Skyactiv G, and 194ps Petrol engines also feature cylinder deactivation, delivering further improvements in economy and efficiency by automatically switching between two-cylinder and four-cylinder operation when cruising at constant speeds and not when under heavy loads. The engine shuts down two of the four cylinders with fuel injection and injection timing precisely controlled, so that the cylinder deactivation isn't noticeable to the driver.

e-SKYACTIV X**

The 186ps e-Skyactiv X powertrain is the very latest in engine technology providing more power, improved fuel efficiency and even lower CO_2 emissions. Exclusive to Mazda, e-Skyactiv X burns petrol more efficiently thanks to our pioneering Spark Controlled Compression Ignition (SPCCI).

With SPCCI, an extremely lean mix of fuel and air are compressed to an extremely high pressure. A spark then ignites a very small, dense amount of fuel, which further raises the heat and pressure in the cylinder, causing the remaining fuel to ignite under pressure (like a diesel). This means you get all the performance of a naturally aspirated petrol engine, but with the fuel economy and low CO_2 emissions of a Diesel.

* 140ps e-Skyactiv G engines available on Mazda3 and CX-30 models.
** 186ps e-Skyactiv X engines available on Mazda3 and Mazda CX-30 models.
Mazda2 Hybrid and Mazda6e does not feature Skyactiv Vehicle Technology.

SKYACTIV-VEHICLE DYNAMICS - ENGINES AND MAZDA M HYBRID MHEV

SKYACTIV-D

Offering the world's lowest compression ratio diesel engines, both our 2.2 SKYACTIV-D and 3.3 E-SKYACTIV D* are fully compliant with all Euro 6 standards, are clean and efficient and are designed to offer you the right engine for your needs without compromise. This delivers on our promise of cars that are fun to drive and meets our commitment to protecting the environment.

Our innovative SKYACTIV diesel technology has a compression ratio much lower than traditional diesels; this allows the combustion temperature and pressure at the optimal moment to be lower, extending ignition so the air and fuel has time to mix much better, making combustion more uniform and complete. The more complete the combustion, the less CO_2 and NOx is produced.

MAZDA M HYBRID CAR

Mazda M Hybrid is our innovative evolution of hybrid car technology. It uses four main components to capture energy that is normally wasted during braking. It stores that energy within the 24v Lithium-ion Battery and uses it to assist the engine and power the car's electrical systems, meaning you can drive further on a tank of fuel whilst also contributing to lower CO_2 emissions and other particulates.

The Mazda3 and Mazda CX-30 feature this new technology which comes as standard on both e-Skyactiv G and e-Skyactiv X petrol engines. The result is a car that delivers outstanding performance, low running costs and strong environmental credentials.

*3.3 e-Skyactiv-D engines available on Mazda CX-60 and Mazda CX-80 models.
Mazda2 Hybrid and Mazda6e does not feature Skyactiv Vehicle Technology.

SKYACTIV-VEHICLE DYNAMICS – TRANSMISSIONS, BODY AND CHASSIS

TRANSMISSIONS

SKYACTIV-MT is a light and compact manual transmission system that combines superior fuel economy with the crisp shifting feel of a sports car, ensuring perfect control.

Also available is Mazda's highly-efficient, 6-speed or 8-speed SKYACTIV-DRIVE automatic transmission. Featuring the best attributes of CVT, Dual Clutch and conventional automatic transmissions, SKYACTIV-DRIVE provides you with a direct feel with smooth gear shifts leading to great fuel economy.

SKYACTIV-BODY

For a car to excel in its basic functions – accelerate, turn and stop – it must have a lean body, but also be sturdy to ensure safety. Each body has been designed around these elements leading to a light, rigid and robust body that ensures safe and joyful driving.

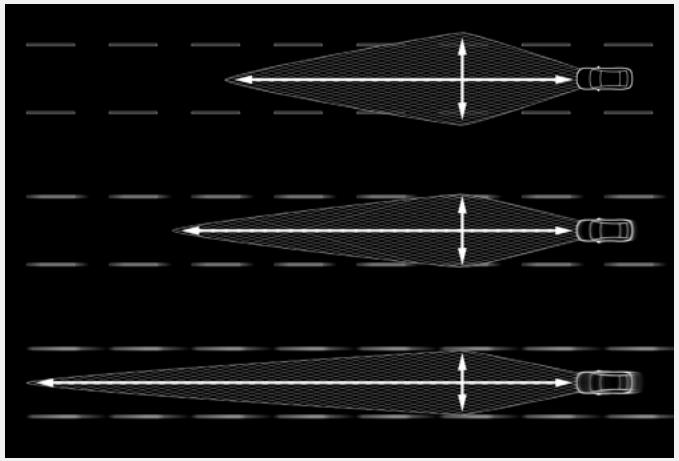

SKYACTIV-CHASSIS

Providing a lightweight chassis that delivers driving pleasure and comfort, leading to that pure 'Jinba Ittai' oneness between car and driver. The perfectly fine tuned chassis provides our famed driving experience of agility at low and medium speeds, and stability at motorway speeds for both driving pleasure and comfort.

Mazda2 Hybrid and Mazda6e does not feature Skyactiv Vehicle Technology.

Advanced Technology

ADAPTIVE LED HEADLIGHTS

Mazda's Adaptive LED Headlights provide the ultimate in headlight technology, lighting up the road ahead as if it were daytime and allowing anybody to enjoy safe and stress-free driving at any time of day.

The system increases visibility at night to help drivers stay vigilant by combining three technologies: Wide-range Low Beams which light up a wider area at low speeds, Highway mode which helps you see further when travelling at speed, and Glare-free High Beams which automatically dim part of the illuminated area to avoid dazzling other drivers.

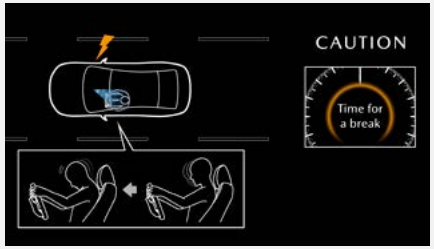

(Available on certain grades across the entire Mazda range)

COLOUR ACTIVE DRIVING DISPLAY (HEAD-UP DISPLAY)

The system includes Traffic Sign Recognition* and projects full-colour information directly within the driver's line of sight. The information displayed includes speed, turn-by-turn navigation, speed limit information*, vehicle status and advanced safety equipment status.

(Standard across the range on Mazda3, Mazda CX-30, Mazda CX-60 and Mazda CX-80)

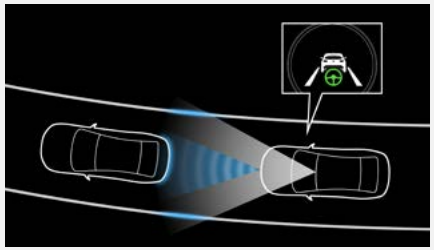

DRIVER MONITORING

Detects sleepiness or inattention by monitoring changes in expression or movement of the driver's line of sight. A camera and infrared LED monitor the driver's condition both day and night. If the system determines that the driver has fallen asleep or is inattentive, it sounds an alert to make the driver aware while also preparing for automatic braking to help prepare for a potential incident.

(Available on certain grades on Mazda3, Mazda CX-30, Mazda CX-60 & Mazda CX-80)

For Advanced Technology featured on Mazda2 Hybrid, please see the bespoke Price & Specification Guide available at www.mazda.co.uk/forms/request-a-brochure.

Advanced Technology

CRUISING & TRAFFIC SUPPORT (CTS)

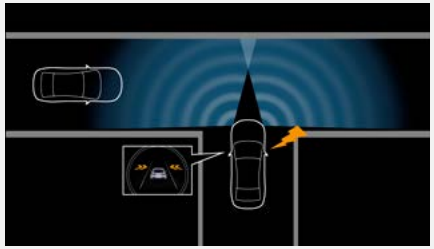

Automatically operates the accelerator and brake pedals to maintain a proper trailing distance between the your Mazda and the vehicle ahead. In addition, it assists with steering operations to keep the car in its proper lane. CTS contributes to reducing driver fatigue, supporting a safer, more reassuring and more comfortable driving experience.

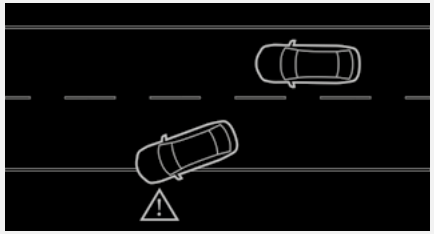

(Available on certain grades on Mazda3, Mazda CX-30, Mazda CX-60 & Mazda CX-80)

FRONT CROSS TRAFFIC ALERT

Mazda's newly developed system detects other vehicles approaching from blind spots at the front right or left of the vehicle and alerts the driver of their presence. This helps prevent a common cause of accidents, when cars enter a T-junction with a partially obscured view.

(Available on certain grades on Mazda3, Mazda CX-30, Mazda CX-60 & Mazda CX-80)

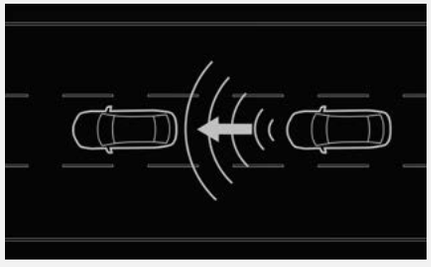

LANE DEPARTURE WARNING SYSTEM (LDWS) WITH LANE KEEP ASSIST SYSTEM

Designed to prevent your vehicle from inadvertently straying from its lane. A front view camera monitors the road ahead and calculates the cars position relative to the lane markings. If the system detects the vehicle is moving out of its lane unintentionally, the steering wheel will vibrate and an audible alert will sound. The system will also take corrective action to help you stay within the lanes through assisted steering.

(Available with differing features across the entire Mazda range)

For Advanced Technology featured on Mazda2 Hybrid, please see the bespoke Price & Specification Guide available at www.mazda.co.uk/forms/request-a-brochure.

Advanced Technology

MAZDA RADAR CRUISE CONTROL

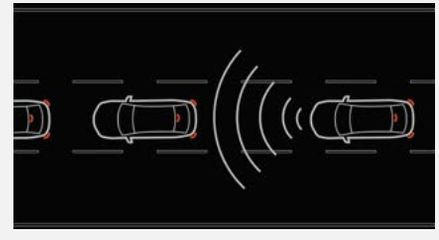

To activate, the driver sets a maximum speed (just as with cruise control) and size of the gap to maintain. The radar watches for traffic ahead and once the system senses a vehicle in front, the car will slow down and speed up automatically maintaining the drivers pre-set distance. Automatic models also have the additional feature of 'Stop & Go', meaning the vehicle will automatically accelerate and brake in start/stop traffic with minimal input from the driver.

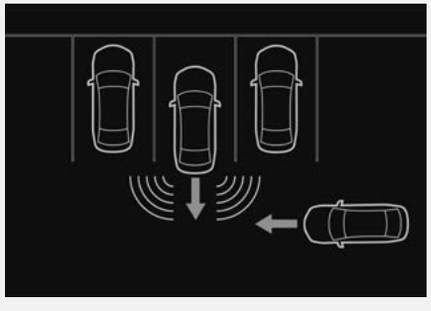

(Standard across the range on Mazda3, Mazda CX-30, Mazda CX-60 & Mazda CX-80)

SMART BRAKE SUPPORT – FRONT

Alerts the driver of a possible collision using the warning indications in the display and a warning sound if the front radar sensor and Forward Sensing Camera determine that there is the possibility of a collision with a vehicle ahead, pedestrian, or a bicycle. Furthermore, if a collision is unavoidable, the automatic brake control is performed to reduce damage in the event of a collision. In addition, when the driver depresses the brake pedal, the brakes are applied firmly and quickly to assist.

(Standard across the Mazda3, Mazda CX-30, Mazda CX-60 & Mazda CX-80)

SMART BRAKE SUPPORT – REAR

Reduces damage in the event of a collision by operating the brake control when the system's sensors detect an obstruction at the rear.

SMART BRAKE SUPPORT – REAR CROSSING

Assists in avoiding accidents and reducing damage by applying the brakes if there is the possibility of collision with a vehicle approaching from the rear while you are reversing out of parking space.

(Available on certain grades across the Mazda3, Mazda CX-30, Mazda CX-60 & Mazda CX-80)

i-ACTIV AWD

Whether you are on the motorway on a dark and rainy night or driving up a snowy country road, Mazda's all-wheel-drive system is designed to provide safety and comfort with fuel efficiency. Our engineers have developed i-ACTIV AWD to constantly monitor road conditions in real-time, watching for tiny variations in wheel speed that a driver would never notice. The system proactively controls the distribution of torque to all four wheels providing solid and predictable handling for all-road performance.

(Available on Mazda CX-30, Mazda CX-60 & Mazda CX-80)

For Advanced Technology featured on Mazda2 Hybrid, please see the bespoke Price & Specification Guide available at www.mazda.co.uk/forms/request-a-brochure.
